

Step 1 - Process Definition Document (PDD)

1. Document Control

Version	Date	Author	Description
1.0	2026-03-13	PFCD Agent	Initial Draft (As-Is Process)

2. Process Overview

- Process Name: Step 1
- Objective: Document current process flow from submitted evidence.
- Frequency: Process initiation event captured from evidence.
- Estimated Volume: TBD
- Manual Effort: TBD

3. Scope

3.1 In-Scope

- Current-state process only.

3.2 Out-of-Scope

- Future-state redesign and optimization.

4. Prerequisites & Systems

4.1 Prerequisites

- Relevant source material is available.

4.2 Application Inventory

Application	Version	Access Method
manual_or_unspecified	Unknown	As observed in evidence

5. Detailed Process Steps (As-Is)

Step #	Action	Role	System	Input	Output
1	[audio] Hey, this RPA challenge is one of the processes we are testing to check how the RPA application is going to work	operator	manual_or_unspecified	process input	[audio] Hey, this RPA challenge is one of the processes we are testing to check how the RPA application is going to work
2	So the biggest challenge here is it's a timed challenge, so we have to make sure we are in a position to do it within that time, which is going to improve the overall capability of the RPA platform	operator	manual_or_unspecified	process input	So the biggest challenge here is it's a timed challenge, so we have to make sure we are in a position to do it within that time, which is going to improve the overall capability of the RPA platform
3	So first of all, we are going to download that Excel file which may have 10 to 20 items	operator	manual_or_unspecified	process input	So first of all, we are going to download that Excel file which may have 10 to 20 items

Step #	Action	Role	System	Input	Output
4	The next thing is basically once you click on start, you have to start updating the Excel values to the corresponding field	operator	manual_or_unspecified	process input	The next thing is basically once you click on start, you have to start updating the Excel values to the corresponding field
5	The only challenge is going to be for every successful entry, the next entry will have at least a change in the field position	operator	manual_or_unspecified	process input	The only challenge is going to be for every successful entry, the next entry will have at least a change in the field position
6	So we should be in a position to understand that particular part before filling in the data	operator	manual_or_unspecified	process input	So we should be in a position to understand that particular part before filling in the data
7	And when you complete all those 10 items, you are going to get an output saying how much time it has taken to complete that action	operator	manual_or_unspecified	process input	And when you complete all those 10 items, you are going to get an output saying how much time it has taken to complete that action
8	Thank you	operator	manual_or_unspecified	process input	Thank you
9	detect_visual_hando	operator	manual_or_unspecified	process input	detect_visual_hando
10	extract_spoken_steps	operator	manual_or_unspecified	process input	extract_spoken_steps
11	[audio] Hey, this RPA challenge is one of the processes we are testing to check how the RPA application is going to work. So the biggest challenge here is it's a timed challenge, s	operator	manual_or_unspecified	process input	[audio] Hey, this RPA challenge is one of the processes we are testing to check how the RPA application is going to work. So the biggest challenge here is it's a timed challenge, s

6. Business Rules & Logic

- No explicit business rules identified from source evidence.

7. Exceptions Handling

7.1 Business Exceptions

- None captured.

7.2 Technical Exceptions

- Retry, log, and escalate to technical owner if persistent.

8. Inputs & Outputs

- Primary Input: process trigger
- Primary Output: Visual cues detected during process walkthrough.

9. Metrics & Risks

- Success Metric: Not explicitly defined.
- Risk: No explicit risks identified.

10. SIPOC

Supplier	Input	Process	Output	Customer
upstream_supplier	process trigger	[audio] Hey, this RPA challenge is one of the processes we are testing to check how the RPA application is going to work	[audio] Hey, this RPA challenge is one of the processes we are testing to check how the RPA application is going to work	operator
operator	[audio] Hey, this RPA challenge is one of the processes we are testing to check how the RPA application is going to work	So the biggest challenge here is it's a timed challenge, so we have to make sure we are in a position to do it within that time, which is going to improve the overall capability of the RPA platform	So the biggest challenge here is it's a timed challenge, so we have to make sure we are in a position to do it within that time, which is going to improve the overall capability of the RPA platform	operator
operator	So the biggest challenge here is it's a timed challenge, so we have to make sure we are in a position to do it within that time, which is going to improve the overall capability of the RPA platform	So first of all, we are going to download that Excel file which may have 10 to 20 items	So first of all, we are going to download that Excel file which may have 10 to 20 items	operator
operator	So first of all, we are going to download that Excel file which may have 10 to 20 items	The next thing is basically once you click on start, you have to start updating the Excel values to the corresponding field	The next thing is basically once you click on start, you have to start updating the Excel values to the corresponding field	operator
