

Initiate Onboarding - Process Definition Document (PDD)

1. Document Control

Version	Date	Author	Description
1.0	2026-03-05	PFCD Agent	Initial Draft (As-Is Process)

2. Process Overview

- **Process Name:** Initiate Onboarding
- **Objective:** To successfully onboard new B2B SaaS customers onto the PFCD Analytics platform, for
- **Frequency:** A prospect signs the commercial agreement in DocuSign.
- **Estimated Volume:** TBD
- **Manual Effort:** TBD

3. Scope

3.1 In-Scope

- This process begins when a prospect signs the commercial agreement and ends when the customer h

3.2 Out-of-Scope

- Future-state redesign and optimization.

4. Prerequisites & Systems

4.1 Prerequisites

- A commercial agreement has been generated and sent to a prospect.

4.2 Application Inventory

Application	Version	Access Method
Data Intake Form	Unknown	As observed in evidence
DocuSign, HubSpot, Jira Service Management, Slack	Unknown	As observed in evidence
Email, Slack	Unknown	As observed in evidence
Internal Review Meeting	Unknown	As observed in evidence
Jira Service Management, Email	Unknown	As observed in evidence
Jira Service Management, HubSpot	Unknown	As observed in evidence
PFCD Analytics Platform	Unknown	As observed in evidence
Video Conferencing	Unknown	As observed in evidence

5. Detailed Process Steps (As-Is)

This is the core of the document. Use a table for structured steps and nested lists for complex logic.

Step #	Action	Role	System	Input	Output
1	A signed contract in DocuSign triggers a webhook to HubSpot, which marks the deal as 'Closed Won'				
2	The Onboarding Specialist picks up the Jira ticket within a 4-hour SLA, reviews the contract scope, a				
3	The customer completes the data intake form, providing admin contacts, reporting requirements, and				
4	The project team holds a kickoff call with the customer to confirm scope, define success metrics, and				
5	The Implementation Lead provisions production and sandbox tenants in the PFCD platform, configur				
6	The Data Engineer receives API or SFTP credentials from the customer, validates connectivity, maps				
7	The QA Analyst runs automated checks on the ingested sample data to ensure it meets quality thres				
8	Customer power users execute a set of core test scenarios. UAT is considered complete when at lea				
9	The Implementation Lead, Customer Project Manager, and Support Manager meet to approve the go				
10	During an agreed maintenance window, the team switches integration endpoints from sandbox to p				
11	After a successful go-live, a confirmation is sent and a 2-week hypercare period begins, with manda				

Step Details

1. Follow the sequence listed in the table above.
2. Apply business rules and exception handling where applicable.

6. Business Rules & Logic

* Define the 'brains' of the process.*

- * **Rule 1:** Onboarding ticket must be picked up within 4 business hours.
- * **Rule 2:** First contact with customer must be same-day if ticket is created before 2 PM local time.
- * **Rule 3:** Data intake form must be completed before the kickoff call.
- * **Rule 4:** Enterprise customers require a completed security questionnaire and DPA confirmation before UAT.
- * **Rule 5:** UAT cannot begin until all data ingestion blockers are resolved.
- * **Rule 6:** Data Quality criteria: completeness > 98%, duplicate rate < 1%, critical field null rate < 0.5%.
- * **Rule 7:** UAT Exit Criteria: At least 11 of 12 core scenarios pass with no open Sev-1 defects.
- * **Rule 8:** Go-live requires approval from the Implementation Lead, Customer Project Manager, and S
- * **Rule 9:** Onboarding Completion Criteria: Production live for 10 business days, no unresolved Sev-1

7. Exceptions Handling

7.1 Business Exceptions

- * **Scenario:** Incomplete intake form triggers reminders at 3 and 6 days.
- * **Action:** Requires business review and follow-up.
- * **Scenario:** Data ingestion failure blocks the process until resolved.
- * **Action:** Requires business review and follow-up.
- * **Scenario:** Sev-2 defects found during UAT do not block go-live if the customer accepts the workarounds.
- * **Action:** Requires business review and follow-up.
- * **Scenario:** Failed go-live smoke tests trigger an immediate rollback procedure.
- * **Action:** Requires business review and follow-up.
- * **Scenario:** Rollback notification must be sent to stakeholders within 15 minutes of failure.
- * **Action:** Requires business review and follow-up.

7.2 Technical Exceptions

- * None captured.

8. Inputs & Outputs

- * **Primary Input:** Signed Commercial Agreement
- * **Primary Output:** Provisioned and configured PFCD Analytics tenant

9. Metrics & Risks

- * **Success Metric:** Time to First Contact
- * **Success Metric:** Time to Kickoff
- * **Success Metric:** Total Onboarding Time (Contract to Go-Live)
- * **Success Metric:** Number of UAT defects by severity
- * **Success Metric:** Data Quality Scores (Completeness, Duplicates, Nulls)
- * **Risk:** Delays in receiving customer API credentials or SFTP details.
- * **Mitigation:** Define owner, threshold, and contingency action.
- * **Risk:** Delays in receiving security and compliance approvals from the customer.
- * **Mitigation:** Define owner, threshold, and contingency action.
- * **Risk:** Delayed stakeholder responses for scheduling UAT.
- * **Mitigation:** Define owner, threshold, and contingency action.
- * **Risk:** Scope creep after kickoff approval.
- * **Mitigation:** Define owner, threshold, and contingency action.
- * **Risk:** Go-live failure requiring rollback.
- * **Mitigation:** Define owner, threshold, and contingency action.

10. SIPOC

| Supplier | Input | Process | Output | Customer |

| :--- | :--- | :--- | :--- | :--- |

| Prospect/New Customer | Signed Commercial Agreement | Initiate Onboarding | Jira Onboarding Ticket

| Onboarding Specialist | Welcome Email & Intake Form | Conduct Kickoff & Scope Definition | Approved

| Implementation Lead | Approved Scope Baseline | Provision & Configure Platform | Provisioned Custom

| New Customer | API/SFTP Credentials | Integrate & Validate Data | Validated Sample Data | QA Analys

| QA Analyst | Data Quality Checklist | Conduct User Acceptance Testing (UAT) | UAT Sign-off | Impleme

| Implementation Lead | Go-Live Approval | Execute Go-Live | Live Production Environment | Customer S
